

UID EX 9

NAME: MIRUTHULAA

ROLL NO: 240701310

AIM:

The aim is to design a student registration form that validates input fields such as name, age, password, and confirm password, and displays appropriate error messages using HTML, CSS, and JavaScript.

PROCEDURE:

Setting Up the HTML Form

Start by creating an HTML form with input fields for email, password

Code:

```
Untitled-1.html X  F Untitled-1
< Untitled-1.html > < html > < body > < script
1  <!DOCTYPE html>
2  <html>
3  <head>
4      <title>Login Form Validation</title>
5      <style>
6          body {
7              font-family: Arial;
8              background-color: #f2f2f2;
9          }
10
11         .container {
12             width: 300px;
13             margin: 100px auto;
14             padding: 20px;
15             background: white;
16             border-radius: 10px;
17             box-shadow: 0px 0px 10px gray;
18         }
19
20         input {
21             width: 100%;
22             padding: 8px;
23             margin: 8px 0;
24         }
25
26         button {
```

```

25
26     button {
27         width: 100%;
28         padding: 10px;
29         background-color: #blue;
30         color: #white;
31         border: none;
32         cursor: pointer;
33     }
34
35     .error {
36         color: #red;
37         font-size: 12px;
38     }
39 </style>
40 </head>
41
42 <body>
43
44 <div class="container">
45     <h2>Login Form</h2>
46
47     <form onsubmit="return validateForm()">
48         <label>Email:</label>

```

```

49         <input type="text" id="email">
50         <div id="emailError" class="error"></div>
51
52         <label>Password:</label>
53         <input type="password" id="password">
54         <div id="passError" class="error"></div>
55
56         <button type="submit">Login</button>
57     </form>
58 </div>
59
60 <script>
61 function validateForm() {
62     let email = document.getElementById("email").value;
63     let password = document.getElementById("password").value;
64
65     let emailError = document.getElementById("emailError");
66     let passError = document.getElementById("passError");
67
68     emailError.innerHTML = "";
69     passError.innerHTML = "";
70

```

```

70     passError.innerHTML = "";
71
72     let valid = true;
73
74     // Email validation
75     if (email === "" || !email.includes("@")) {
76         emailError.innerHTML = "Enter a valid email";
77         valid = false;
78     }
79
80     // Password validation
81     if (password.length < 6) {
82         passError.innerHTML = "Password must be at least 6 characters";
83         valid = false;
84     }

```

```

let valid = true;

// Email validation
if (email === "" || !email.includes("@")) {
  emailError.innerHTML = "Enter a valid email";
  valid = false;
}

// Password validation
if (password.length < 6) {
  passwordError.innerHTML = "Password must be at least 6 characters";
  valid = false;
}

if (valid) {
  alert("Login Successful!");
}

return valid;
}
</script>

```

```

81 function validateForm() {
82   passwordError.innerHTML = "Password must be at least 6 characters";
83   valid = false;
84 }
85 if (valid) {
86   alert("Login Successful!");
87 }
88
89 return valid;
90 }
91 </script>
92
93 </body>
94 </html>

```

Output:

Login Form

Email:

Password:

Password must be at least 6 characters

Login

Login Form

Email:

Enter a valid email

Password:

Login

Login Form

Email:

ilakkiya@gmail.com

Password:

Login

This page says
Login Successful!

OK

Login Form

Email:

Password:

Login
